Business Operating Environment

The Company commenced its financial year in April 2019, shortly after the successful completion of the parliamentary, gubernatorial and presidential elections. The new government helped to disperse the fear of political uncertainty created during the elections, ensured a peaceful atmosphere and refocused its attention on building the economy.

The Nigerian economy, however, recorded an average annual growth rate of 2.2% in real terms in 2019 compared to 1.9% the previous year. This was largely driven by the growth in the oil sector.

Inflation on the other hand trended upwards from 11.7% in April 2019 to 12.3% in March 2020; crude oil production decreased during the review period while FGN reserves reduced to \$36bn by the end of March 2020. Exchange rate (NGN/USD) was quite stable at around ₦364/\$, until the effect of the coronavirus (“Covid-19”) caused the exchange rate to increase to around ₦385/\$ in March 2020.

In Q1 2020, the performance of the Nigerian economy was significantly impacted by the international ramifications of the coronavirus on oil prices, global trade and supply chains. Nigeria's GDP contracted to 1.9% in Q1 2020 from 2.6% in Q4 2019, representing a decline of 70 basis points.

The oil sector recorded a real growth of 5.1% in Q1 2020, a decrease of 1.3% points when compared to the previous quarter, which was 6.4%. The non-oil sector also witnessed a slowdown in Q1 2020 compared to Q4 2019 and grew by 1.6% in real terms during Q1 2020, compared to 2.3% in Q4 2019.

According to the National Bureau of Statistics, the Manufacturing sector, grew at a slower rate of 0.4% in Q1 2020, compared to 1.2% in Q4 2019. The retail, real and service sectors also experienced a slow-down, attributable to the low purchasing power of consumers as inflation rises amidst border closure, naira devaluation as well as global disruption caused by the coronavirus pandemic.

FMN in FY'20

Despite these macroeconomic challenges, FMN had a successful year with strong revenue growth in a competitive business environment, driven by the upswing in volumes. Revenue grew by 7% from ₦370.2bn to ₦394.9bn, while profit after tax stood at ₦12.6bn.

The Food segment continues to grow and diversify as FMN remains focused on delivering superior quality and broadening the consumer offerings in the Business to Consumer segment.

FMN's investments into profitable local content and value addition positions the Company for further profitable growth in the 2020/21 financial year.

Segment Performance

FMN's business segment includes Food and Support services, with diverse products widely spread across several states in Nigeria. The Company has presence in Lagos, Calabar and Kano.

BAGCO – Lagos and Kano; Pasta Operations – Agbara; Flour Operations, Pasta Operations – Lagos; Flour Operations - Calabar

The Food Segment

For the period under review, the Food segment maintained its winning ways by continuing to focus on improving quality and service delivery.

- The Company introduced the 'Gold Standard' of manufacturing for most of its wheat-based products, including bread flour and Semovita. The introduction of the 'Gold Standard' means that FMN now has the highest and most stringent manufacturing processes in place to ensure that the production of its Golden Penny products is in line with global best practices.
- FMN's continuing focus on quality resulted in the accreditation by Bureau Veritas, a world leader in testing, inspection and certification, with the Food Safety System Certification (FSSC 22000), a Global Food Safety Initiative (GFSI) standard.
- FMN introduced a new 2.5kg fresh pack solution for the 5kg and 10kg Semovita packs, double packed to ensure the products remain fresh with a longer shelf life.
- FMN introduced the Golden Penny Jollof Noodles and Auntie B Pasta and Semolina. The Golden Penny Jollof Noodles combines the ease of preparation with the exciting, yet familiar flavors that are reminiscent of the famous Nigerian Jollof Rice. The Auntie B range was introduced as a response to the market's demand for a high quality yet pocket-friendly product, broadening the Company's product offerings to wider consumer segments.

The growth in the Food segment is supported as well by a concentrated effort in the route to market to over 500,000 points of sale across the nation. FMN continues to ensure products availability, increased market presence and strong customer focus.

Support Services

During the year, the bagging and packaging business, BAGCO, experienced some disruptions to projected sales of harvest bags due to initial market reactions to the closure of the land borders. However, this was tempered by the increasing demand for locally produced fast-moving consumer goods that the border closure also created.

FMN immediately initiated plans to expand operational capacity by installing a new lamination line at BAGCO ahead of the additional slitting and rewinding line required to improve production efficiency. FMN also implemented further expansions to the printing operations at BAGCO to meet the increasing demands.

During the financial year, FMN, through its division, BAGCO also introduced an innovative high premium product - Tubed Sac with three variants – "Glued Tubed sac with inner liner", "Laminated Tubed Sac", "Laminated Tubed Sac with block bottom".

At the Transport division, FMN continued to focus on improving operational efficiency and excellence in service delivery. FMN initiated a renewal and revitalization strategy for the transport and logistics operations for a fleet of over 400 trucks.

RATING RATIONALE

- Agusto & Co. hereby reviews the rating assigned to Flour Mills of Nigeria Plc. ("Flour Mills", "FMN" or "the Company") to an 'A-', on account of the significant improvement in leverage metrics, good cash flow, satisfactory working capital, good profitability compared to industry average and qualified and experienced management team. The assigned rating also takes into consideration FMN's market leadership in the flour milling industry, wide and diversified product portfolio, extensive distribution channels, strong brands in the Nigerian fast-moving consumer goods (FMCG) sector as well as significant investment in backward integration programmes. Nonetheless, the rating is tempered by its long-term funding mismatch, which is being addressed, negative macroeconomic headwinds, shrinking consumer wallets, worsened by the adverse impact of the coronavirus pandemic (Covid-19) on businesses and households.
- Flour Mills' is a fully integrated food company and the largest flour milling business listed on the Nigerian Stock Exchange, with a milling capacity of circa 3 million metric tonnes per annum. The Company has made notable gains and consolidated its investments in backward integration initiatives in the agro-allied space to source raw materials locally in a bid to lower input costs and moderate the impact of volatility in foreign exchange on the business. Flour Mills has an extensive product portfolio which caters to diverse consumer segments and a robust distribution network of over 300 distributors spread across the country.
- During the financial year ended 31 March 2020 (FYE 2020), Flour Mills' topline trended upwards by 7% to ₦394.8 billion, with food business segment accounting for 94% of turnover, largely due to growth in demand. Pre-tax profit margin stood at 4.4%, higher than the five-year average of 3.8%, on account of the significant reduction in finance costs due to the deleveraging of the Company's balance sheet with injection of long-term bonds to replace short term borrowings. FMN's pre-tax return on average assets (ROA) remained unchanged at 12.3% (2019: 12.3%), while the pre-tax return on average equity of 12.3% (2019: 14%) was above the above return on 364-day treasury certificate of 11.3%.
- Flour Mills' operating cash flow (OCF) rose by 21% to ₦65.5 billion, mainly due to a significant decline in amounts due from related parties and an increase in other creditors and accruals. The Company's OCF was adequate to meet returns to providers

Attention: The Chief Executive

Dear Sir,

OPINION OF THE SOLICITORS TO THE SERIES 4 UP TO ₦29, 890, 000,000 (TWENTY NINE BILLION, EIGHT HUNDRED AND NINETY MILLION NAIRA) BOND ISSUANCE (SERIES 4 BONDS) UNDER THE ₦70, 000, 000, 000.00 (SEVENTY BILLION) BOND PROGRAMME, CONFIRMING THE DIRECTORS' OPINION ON THE EFFECT OF ALL PENDING OR CONTEMPLATED CLAIMS BY OR AGAINST FLOUR MILLS OF NIGERIA PLC.

We confirm that Flour Mills of Nigeria Plc. (FMN) is currently involved in thirty-one (31) lawsuits all in the ordinary course of its business. Eight (8) of these suits were either instituted by FMN or FMN filed a counter claim, while the outstanding twenty-three (23) suits were instituted against FMN. We have enclosed a schedule of the said matters as at 3rd September 2020.

The total amount claimed in the lawsuits that were either instituted by FMN or in which it filed a counter-claim is approximately ₦376, 034, 980.79 (Three Hundred and Seventy Six Million, Thirty Four Thousand, Nine Hundred and Eighty Naira, Seventy Nine kobo). The amount claimed in the lawsuits instituted against FMN, is ₦2, 035, 154, 009.91 (Two Billion, Thirty Five Million, One Hundred and Fifty Four Thousand, Nine Naira, Ninety One kobo) and €79, 700 (Seventy-Nine Thousand, Seven Hundred Euros).

In our opinion, the contingent liability to which FMN may likely be exposed on account of these matters are not likely to exceed the sum of ₦2, 035, 154, 009.91 (Two Billion, Thirty Five Million, One Hundred and Fifty Four Thousand, Nine Naira, Ninety One kobo) and €79, 700 (Seventy-Nine Thousand, Seven Hundred Euros).

Except as stated above, we are not aware of any other pending or threatened claims involving FMN which are material to the proposed Series 4 Bonds. Having considered the information provided by the solicitors representing FMN in the various claims, we are of the opinion that none of the cases referred to above is likely to have any material adverse effect on FMN or the Series 4 Bonds.

The directors of FMN have indicated that they are not aware of any other pending and or threatened claims or litigation except for those referred to above and that in their opinion,

none of the cases is likely to have any material adverse effect on FMN or the proposed Series 4 Bonds.

Yours sincerely,

Zainab Babalola
