RATING RATIONALE

C & I Leasing Group's ("C & I" or "the Group") rating is supported by good asset quality, adequate capital and a stable and experienced management team. The rating is, however, constrained by low profitability, a funding mismatch and the weak macroeconomic climate which has been accentuated by the COVID-19 pandemic. The drop in crude oil prices in particular had an adverse impact on performance with over 37% of the Group's income generated from the provision of marine support services to the oil & gas sector. C & I is one of the largest leasing companies in Nigeria and West Africa. The Group comprises C & I Leasing Plc, Nigeria and two subsidiaries: EPIC International FZE, United Arab Emirates, and Leasafric Ghana Limited. C & I provides vessels, finance leases, fleet maintenance and car rental services and personnel outsourcing services.

As at 31 December 2019, the Group had total assets of ₦56.2 billion, 54.3% of which was accounted for by operating lease assets primarily comprising marine vessels (69.6%) and motor vehicles (27%). C & I has a marine fleet of 21 vessels with an average age of 5 years, which is favourable in comparison to useful lives of 25-30 years. We believe the relatively young age of the vessels enhances the Group's earning capacity while crew boats are versatile with utility in the general transportation of people and cargo. Operating lease service receivables were the second largest contributors to C & I's total assets with 14%. As at 30 June 2020, marine leases accounted for 87.1% of operating lease service receivables with more than half being exposures to IOCs, which we view positively given the low associated credit risk. Nonetheless, we note that in periods of low oil prices, the day rates of these vessels are reduced and delays in payments occur, which has an adverse impact on the cash flow of C & I.

As at 30 June 2020, ₦1.2 billion of operating lease rentals were more than 90 days past due, a considerable increase from ₦304 million at the end of 2019. The Group's past due operating lease rentals as at 31 December 2019 equated to 3.9% of receivables, which was better than our benchmark of 5%. However, the ratio worsened to 15.8% as at 30 June 2020. The past due receivables were

Summary rating rationale

- The ratings take into consideration C&I Leasing Plc's ("C&I" or "the Group") entrenched brand in the equipment leasing and logistics sector, as well as the relative stability of revenue (underpinned by rapid business growth and expansion). However, of major concern is the high level of leverage and significant liquidity pressure displayed at FY19 and 1H FY20.
- The rating has been placed on Negative Outlook given that the impact of the COVID-19 pandemic is considered high (particularly for the Group), based on its business focus in transportation and logistics. Also, a sizeable portion of C&I's clientele base operate in the susceptible oil and gas sector. However, long-term business growth potential for the sector is considered strong.
- Revenue grew consistently throughout the five years of review, displaying a compounded annual growth rate ("CAGR") of 21.8% in FY19. Growth has been largely driven by business expansion and strategic alliance opportunities undertaken across the Group between FY15 and FY18. While management had expected revenue growth to be sustained over the short medium-term, current year revenue have been impacted by movement restrictions across the globe due to the COVID-19 pandemic. In as much as the decline in revenue is likely to be sustained for the rest of FY20, this is expected to bounce back in the medium to long-term.
- Profit margins were unstable in the five years to FY19, albeit remained within strong range for most of the period. Particularly performance has been largely constrained by the continuous increase in finance cost, exacerbated by current macroeconomic challenges. As such, pre-tax profit declined year-on-year (y/y) by 34% in FY19 and by annualised 25% at 1H FY20. In the interim, management has embarked on cost curtailment initiatives to contain profitability pressures.
- Sourcing of long-term funding remains a major challenge across the sector and for the Group in particular. As such, the Group financed a substantial portion of its business expansion through short-term debt, which could further strain the liquidity position. Resultantly, operating cash flow coverage of debt declined to 6%, which is considered low. Positively, C&I is currently in the process of raising up to N10m, via issuance of bonds, to refinance some of the short-term debts and ease liquidity pressure.
- Gearing metrics remain elevated, as net debt to EBITDA is sustained at 336% at 1H FY20 (FY19: 339%) and likely to remain within current range in the short-term. However, the fact that management does not plan for any major capex for the next three years is expected to see gearing metrics slowly taper down over the medium term.
- C&I has grown its capital base over the review period through a combination of retained earnings and capital raises. Accordingly, the capital adequacy ratio ("CAR") improved to 22% at 1H FY20 (FY19: 20%, FY18: 18%), following an additional capital injection through rights Issuance of up to N2.3bn during the period. Furthermore, a loan stock of about N2bn is expected to be converted to equity before the end of FY20.

Factors that could trigger a rating action may include

Positive change: Ability of the Group to successfully raise longer tenored fund such that funding profile and gearing metrics improves significantly. Also, an improvement in profitability over the medium-term would also support firmer credit protection metrics.

Negative change: Further deterioration in profitability and liquidity metrics, such that weakens operating cash flow and/or interest rate coverage, could result in rating downgrade.

RATING RATIONALE

Agusto & Co has assigned an Indicative rating of "Bbb+" to C&I Leasing Plc.'s ("C&I Leasing", "the Issuer") ₦10 billion Series 1 Fixed Rate Senior Secured Seven-Year Bond ("the Issue", "the Bond"). The Bond is secured by 15 marine vessels – 10 unencumbered vessels and 5 encumbered vessels ("the Security") – owned by the Issuer and jointly valued at ₦17.2 billion on the open market by Uboji Eleh & Co. The rating is supported by a notching up of the Issuer's "Bbb" rating due to a 66% expected recovery rate from the enforcement of the Security under a forced sale ₦12.9 billion valuation and after the repayment of the balance due to the Series I bond and the encumbered vessels' creditor. In our view, the expected credit loss on the Issue is moderate in the event of default because of the marine vessels which provide credit enhancement for the Bond.

The Issuer has good asset quality underpinned by good capacity utilisation, with most vessels tied-up in long term contracts. C&I Leasing Plc also has good quality obligors (including international oil companies) with relatively low delinquent rates on receivables. The Issuer's good asset quality is also reflected in the relatively young average age of the marine vessels which enhances the Issuer's earning capacity while C&I Leasing's crew boats are versatile with utility in the general transportation of people and cargo. Transaction summary

C&I Leasing Plc's ("C&I" or "the Issuer") N10bn Series 2 Bonds are the second series of bonds to be issued under the N20bn Debt Issuance Program ("DIP") embarked upon by the Issuer in 2018. The Issuer is authorized, through an enabling resolution of its Board of Directors ("board"), to issue the fixed rate redeemable Bonds by way of a book build within such periods and under different terms and conditions as the company may deem appropriate. The first series of bonds issued under the DIP (Series 1 Bonds), issued in 2018 constituted senior secured obligation of the Issuer. The Series 1 Bonds raised a sum of N7bn, with N4.8bn being the outstanding balance on the principal as at November 2020. On the other hand, the Series 2 Bonds is being proposed for a seven-year period, with a two-years moratorium on principal. The Series 2 Bonds will constitute direct, senior, secured and unconditional obligations of the Issuer, and rank *pari-passu* without preference with other outstanding senior secured obligations of the Issuer (existing and future).

Summary rating rationale

- The Issuer is a leading brand in the equipment leasing and logistics sector in Nigeria, underpinned by its wide market coverage and entrenched experience. Global Credit Rating Company Limited affirmed the long-term national scale rating of C&I as BBB_(NS) in October 2020, with the outlook accorded as Negative.
- The indicative rating of the Series 2 Bonds is derived by applying a notching approach, starting from the unsubordinated unsecured credit rating of the Issuer. The accorded indicative rating reflects the unsubordinated and secured nature of the Bonds to be issued, which will rank at par with all senior secured indebtedness of the Issuer. Accordingly, the Series 2 Bonds have been accorded an *indicative, public national scale long-term rating* of BBB⁺_(NS), which is one notch higher than the unsubordinated unsecured credit rating of the Issuer, based on the estimated "Good Recovery Prospects" of the Security in an enforcement scenario, based on the recovery rate calculations on page 3 of this report relying on the covenant by the Issuer to secure from the relevant third-party, a deed of release in respect of the encumbered vessels on the date of repayment of all outstanding obligations to the third party.
- A legal opinion from the solicitor to the Trustees (G.Elias & CO.) of the Series 2 Bonds confirms that the transaction documents are legal, valid, binding and enforceable against the Issuer by third parties and any insolvency official. Also, the security deed is stated to be enforceable notwithstanding the bankruptcy or insolvency of the Issuer.

Factors that could trigger a rating action may include:

Positive change: A positive movement in the rating of the Issuer could trigger a positive rating action.

Negative change: A significant change in the final transaction structure, non-compliance with covenants, and/or a downgrade of the Issuer's rating, would trigger a negative rating action.

^a Indicative rating and outlook, to be converted to a final rating and outlook upon the receipt of all final transaction documents.

- c. values will remain static throughout the period.
- d. the assets will be freely exposed to the market
- e. no account is to be taken of an additional bid by a special purchaser.

METHOD OF VALUATION:

MARINE VESSELS.

These have been considered in the light of their continuous existing use and are valued by the depreciated replacement cost (DRC) method.
